As Optimax celebrates our 20 Year Anniversary, we are focused on maintaining our progressive corporate culture and keeping on the path of continuous learning. Optimax is the largest independent prototype optics manufacturer in the U.S., with more than 160 talented employees and we are seeking people with skills to strengthen our workforce.

We are committed to innovation and greater reliability in manufacturing solutions for precision optics and are investing in over $5 million of capital equipment to double our capacity for high precision optics. In 2010 and again in 2011, Optimax experienced a 30% increase in business, resulting in a 20,000 sq ft addition to our manufacturing facility and the creation of more than 50 new jobs.

As our business has prospered, so has the generosity of our employees. Even in tough economic times, Optimax is a top contributor to the Wayne County United Way. In the past couple years, our folks have also established grassroots efforts to support fellow employees that are faced with serious burdens:

- Coordinated a fundraiser for an employee diagnosed with an aggressive type of cancer, raising $29,000 for medical expenses – fought it, put the cancer into remission!
- Supported and fundraised for an employee’s daughter diagnosed with cancer – she fought it, put the cancer into remission!
- Organized a blood drive to replenish the Red Cross on behalf of an employee with leukemia who requires continuous blood transfusions and a bone marrow transplant
A great company is marked by more than financial success and business growth; it is a reflection of the corporate culture and the quality of life afforded to the employees. Optimax has both and we are proud to lead our workforce into a new era of mutual prosperity.
